

AEROSOFT – THE SIMULATION COMPANY

“Offering modern simulation products in a high quality at a fair price - that’s our passion. In doing so we focus on the satisfaction of our customers and the quality of the simulation.”

For over 25 years, Aerosoft GmbH has been acknowledged for high-quality simulation products. Rooted in the flight simulation business, add-ons for the Microsoft Flight Simulator and the company’s own hardware ACP (Aircraft Control Panel) were published first. Meanwhile, Aerosoft also supports the popular flight simulations XPlane, Prepar3D, and Aerofly FS and publishes numerous add-ons for these platforms.

From 2002 onwards, Aerosoft extended the product range to other PC simulations. In addition to add-ons for the Train Simulator, popular titles such as World of Subways, OMSI, the Fernbus Coach Simulator, Emergency Call 112 – The Fire Fighting Simulation, and the Autobahn Police Simulator are among the brand families at Aerosoft. In 2017, Straw Harvest was the first add-on published for the Farming Simulator. A wide range of special hardware completes the product range.

With more than 30 employees and more than 50 free developers worldwide as well as numerous cooperations, Aerosoft is one of the leading software manufacturers and publishers worldwide in the field of simulation games today. Thanks to its strong distribution partners in Europe, South America and the USA, Aerosoft today generates more than 50 % of its sales abroad. The high quality standard of the products is repeatedly proven by international awards and a customer satisfaction rate of over 90 %. The Aerosoft online shop currently offers one of the largest PC simulation ranges in the world, with nearly 1 000 products.
